

Abdominal lymph nodes: _____

Peritoneum:

If yes, bowel obstruction:

Lung:

Bone:

If yes, neurologic risk:

Static instability:

Distribution of bone metastases:

Other:

If yes, location:

Tumors related to a cancer predisposition syndrome

MEN1: *(please select all that apply)*

Pituitary

Parathyroid

Thymus

Adrenal gland

Pancreatic NEN

NF1: *(please select all that apply)*

Pheochromocytoma

Neurofibroma

VHL: *(please select all that apply)*

Serous cystadenoma

Hemangioblastoma

Pheochromocytoma

BTS: *(please select all that apply)*

Angiomyolipoma

Lymphangioliomyomatosis

Radiological TNM classification (following ENETS classification)

T:

N:

M:

Target and non-target selection according to RECIST 1.1 (2 targets/organ (max. 5), short axis for LN)

Target 1: Location: Size: mm

Target 2: Location: Size: mm

Target 3: Location: Size: mm

| | | | |
|-----------------------|-----------|-----------|----|
| Target 4: | Location: | Size: | mm |
| Target 5: | Location: | Size: | mm |
| | | Sum size: | mm |
| Non target: Location: | | | |
